

Assignment

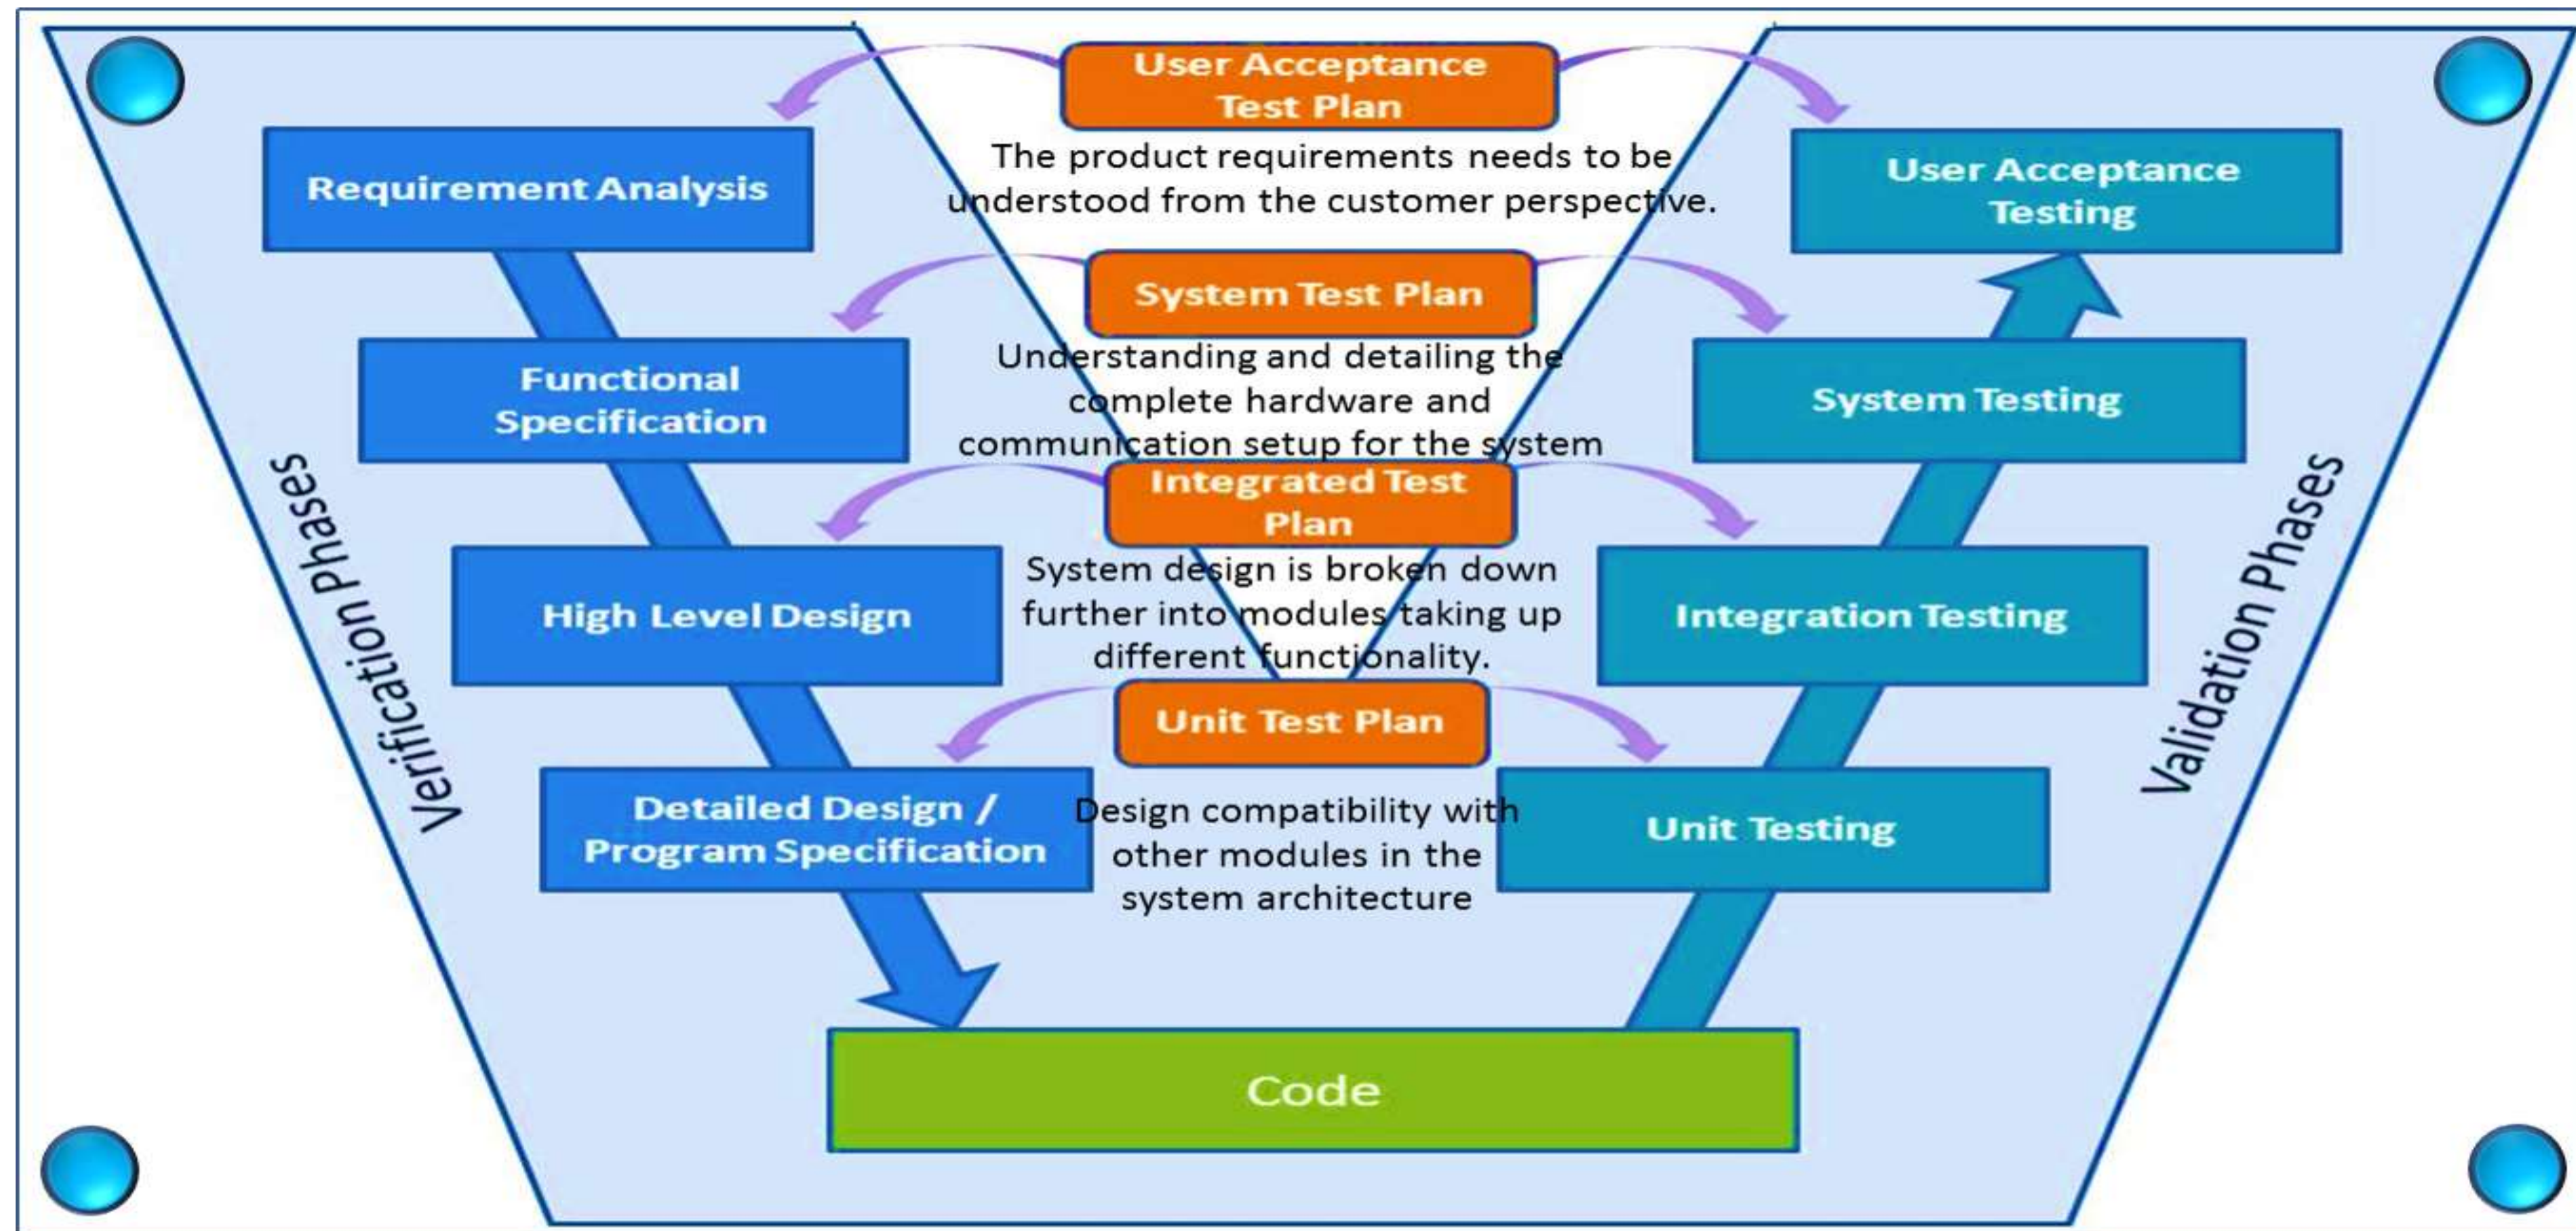

Title

Requirement life cycle
for Customer
segmentation model
for a
telecommunications
company

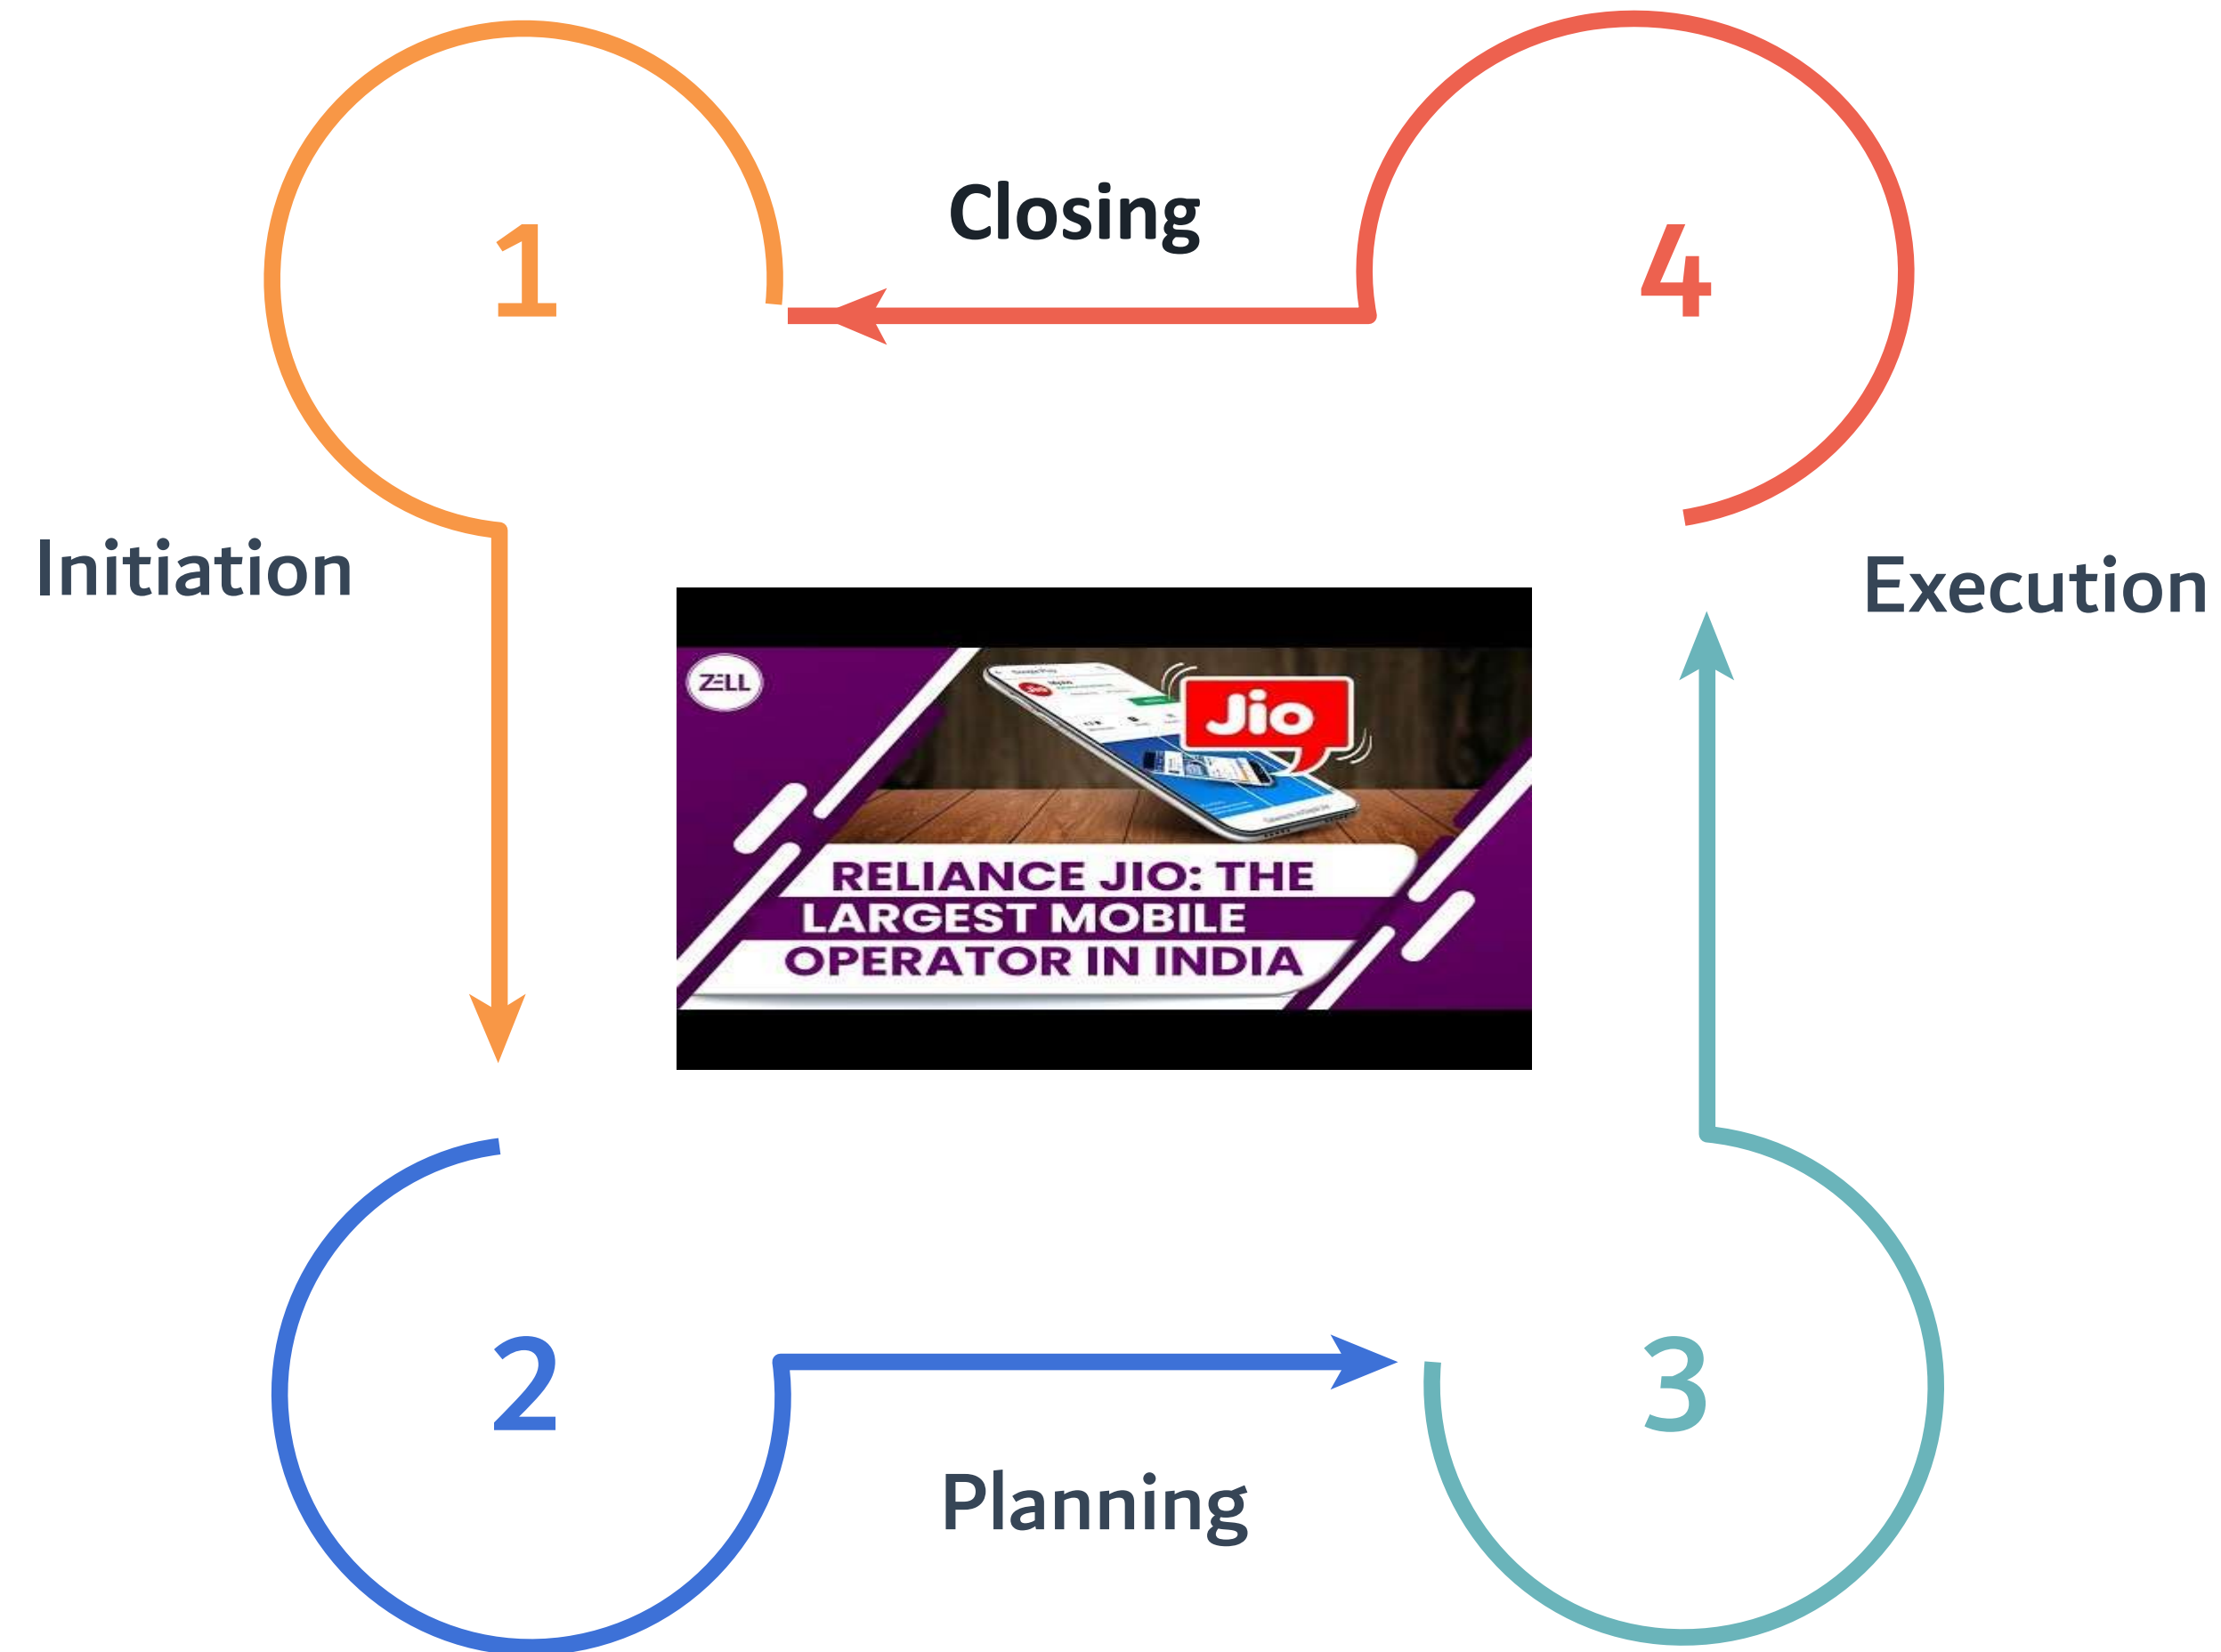

System Development life Cycle

Designing software is the process of transforming user requirements into a suitable form, which helps the customer using the services. During the software design phase, the design document is produced, based on the customer requirements as documented in the SRS document.

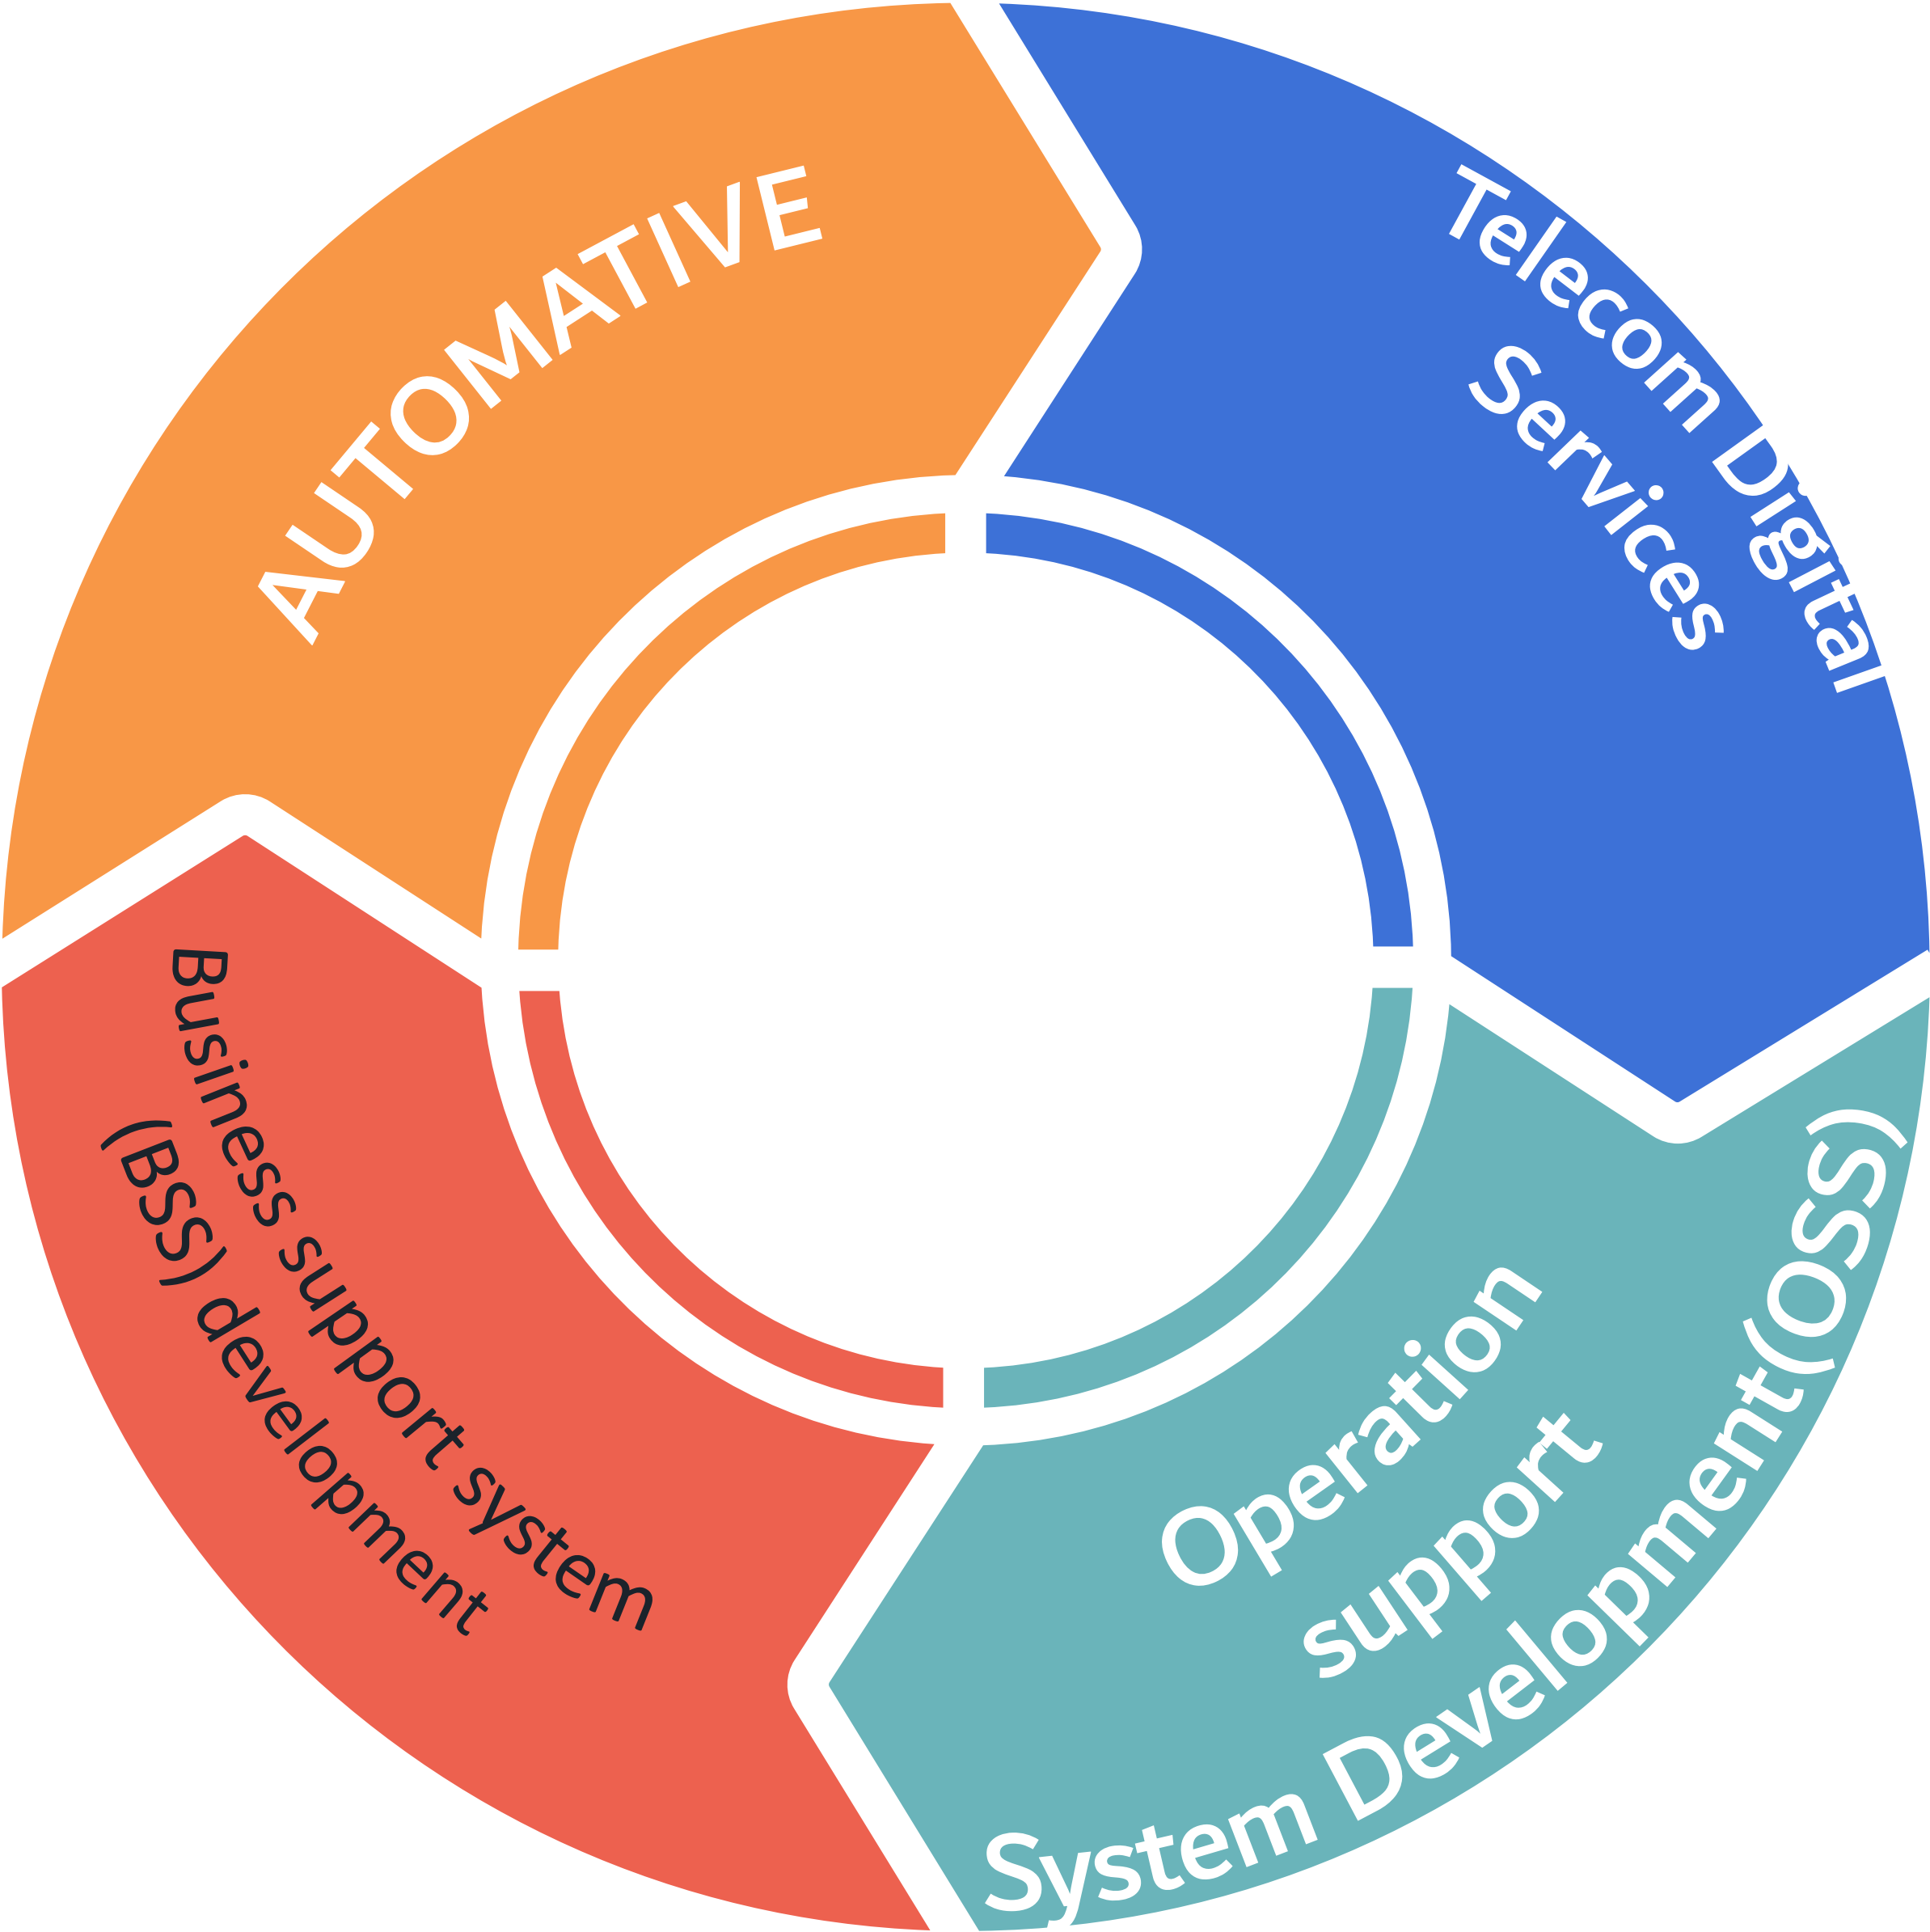

Reliance Tele Communication

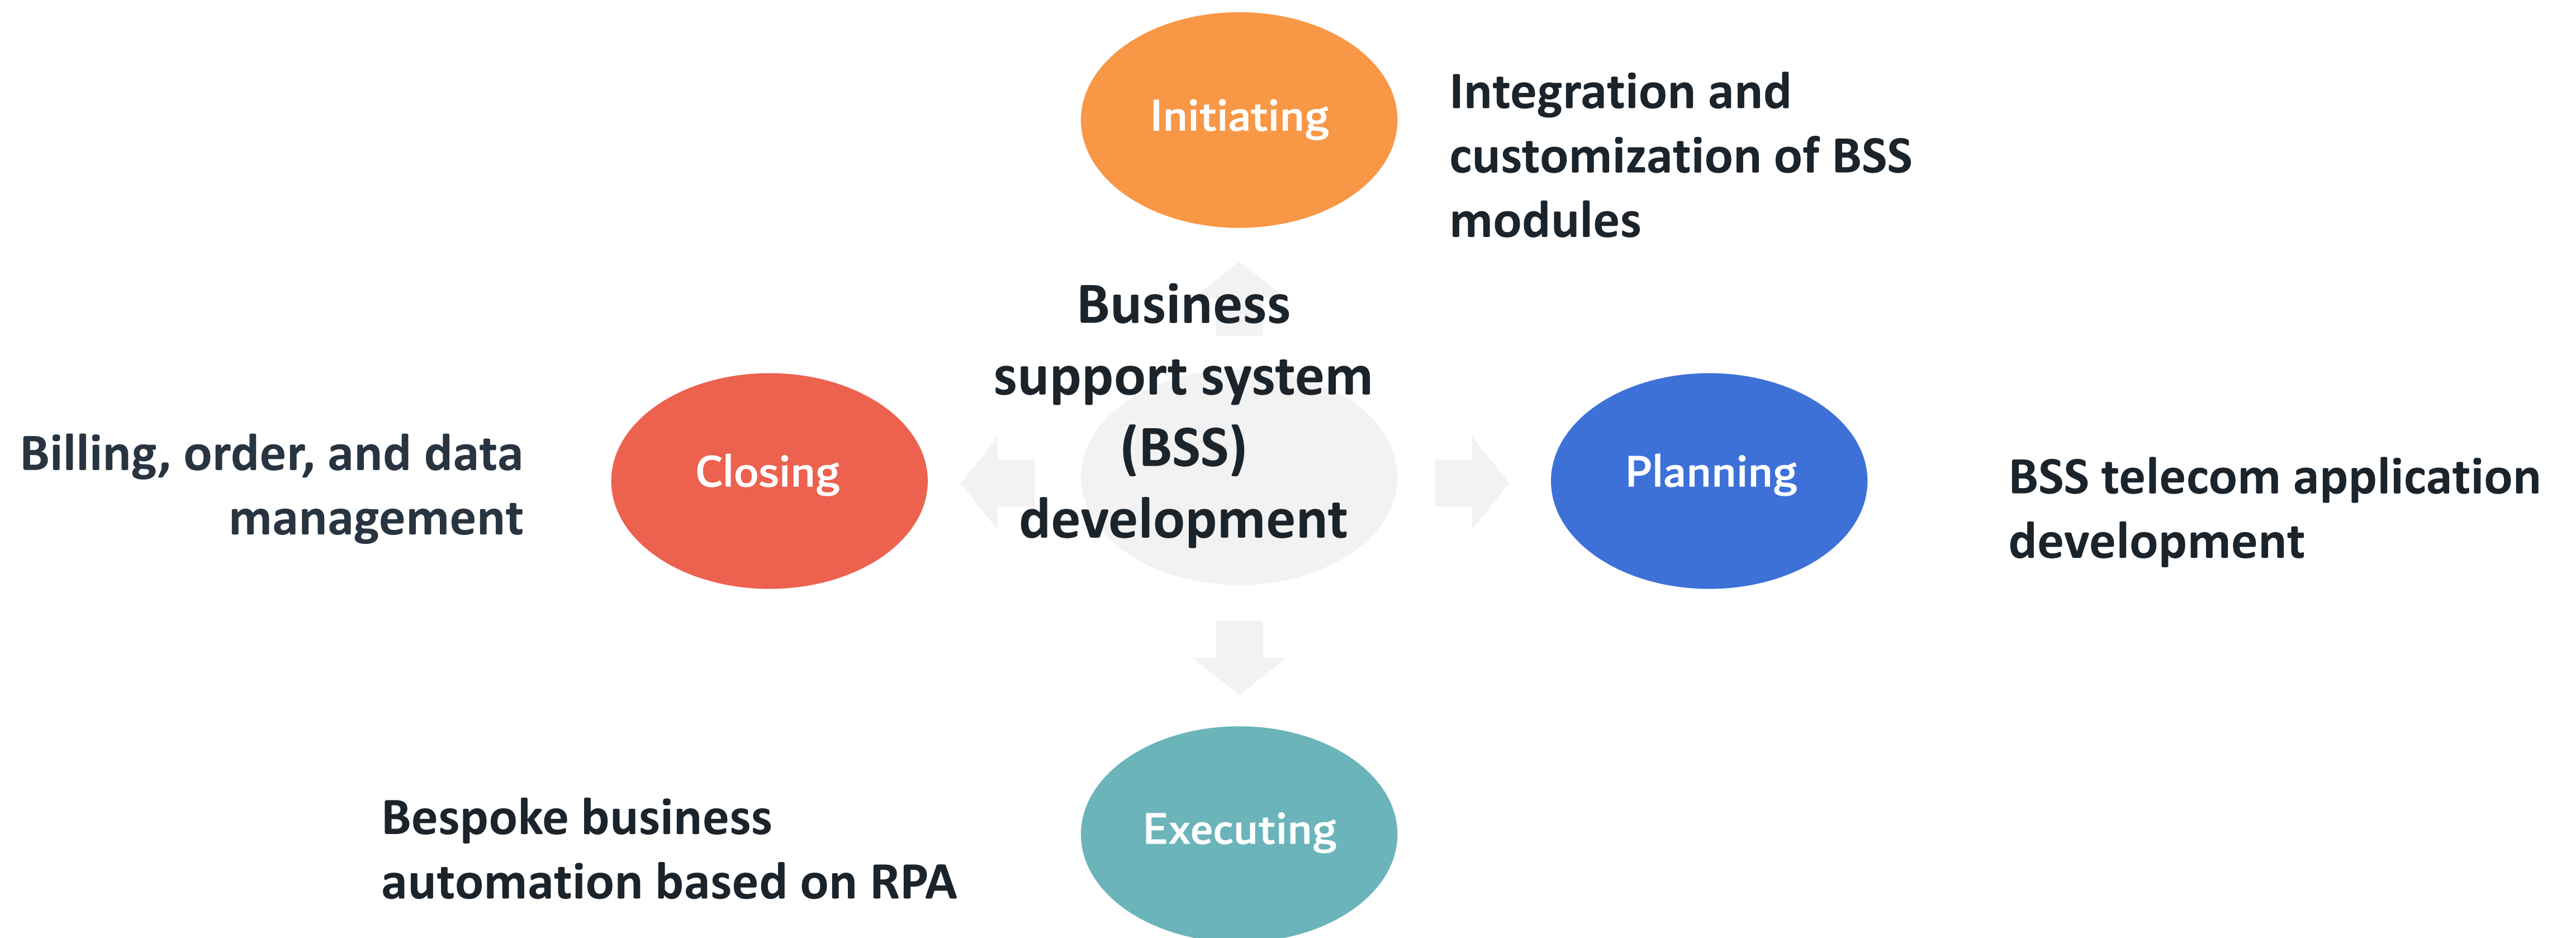

This video explains how reliance tele telecommunication is a trend setter in the Tele Market

**Reliance telecom software
development services**

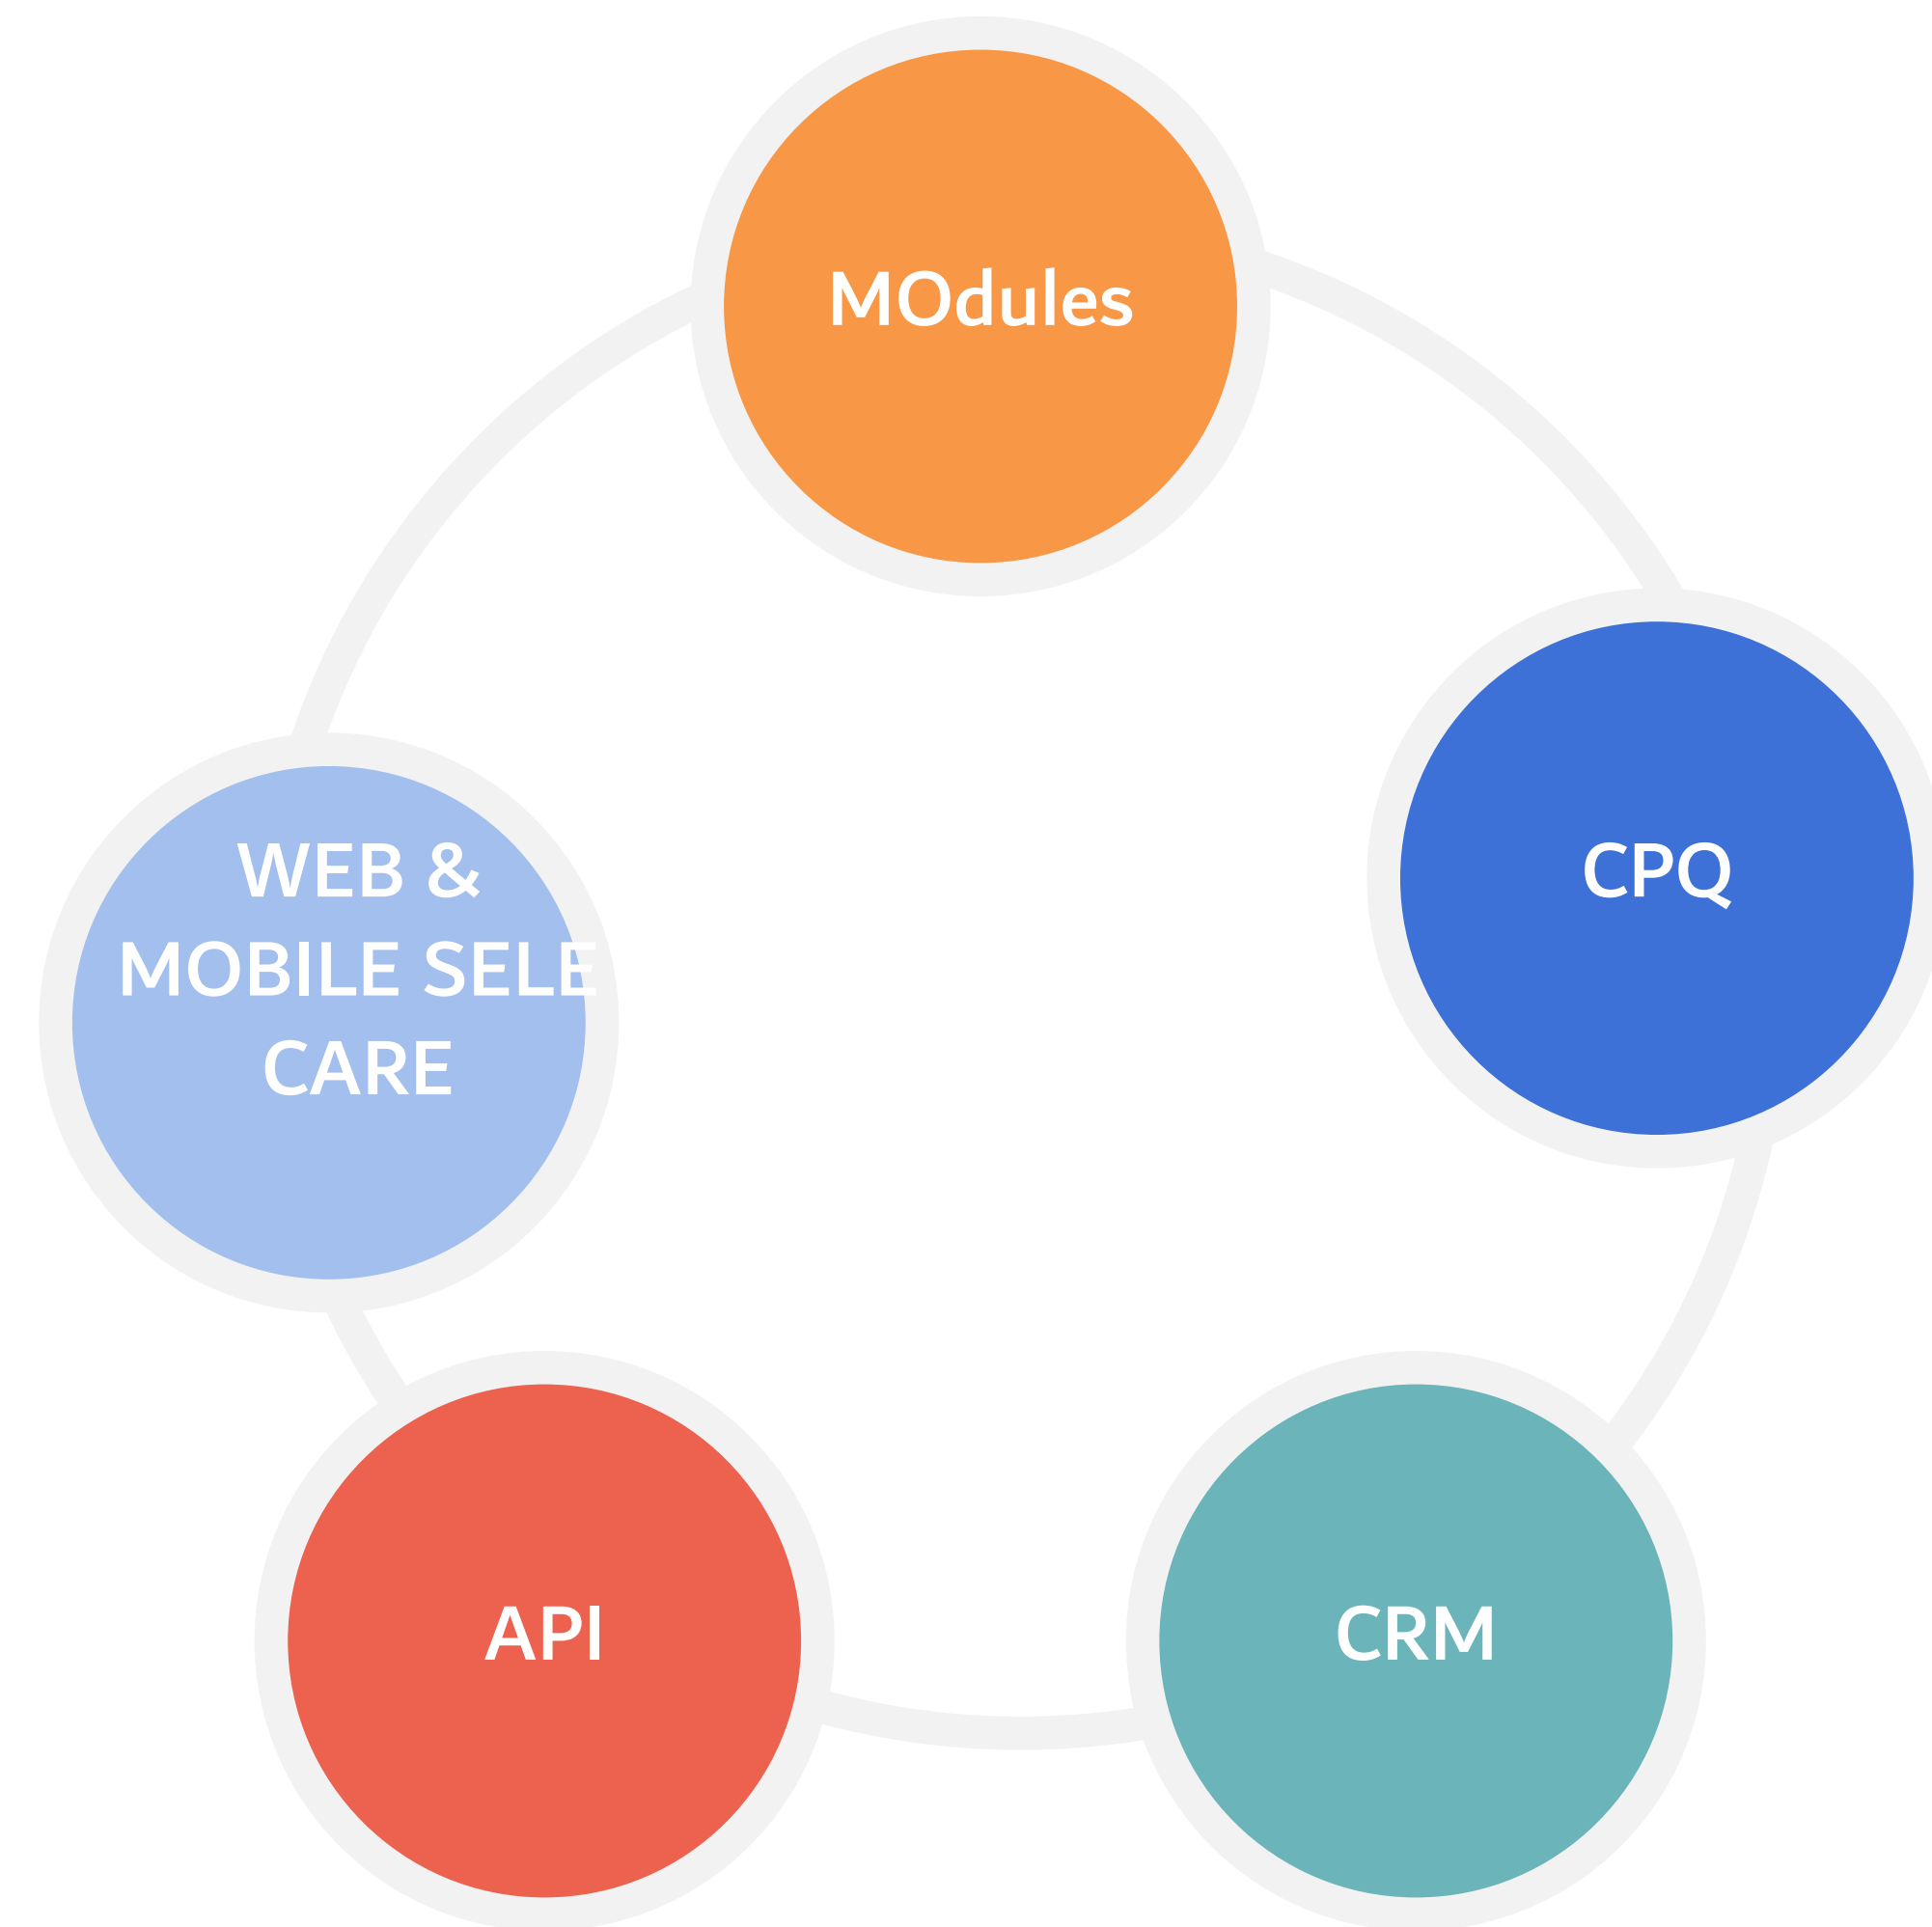

Project Life Cycle

Get connected to the world of advanced telecommunications software with an expert solutions provider. IntelliMax helps telecommunications companies accelerate their digital services transformation, add competitive value to their offerings, and generate new revenue stream.

Industry Focus

Empowers leading communications service providers (CSP), vendors, and system integrators (SIs) to accelerate their digital transformation journey by enabling new revenue streams, technologies and business models. Catalyze your speed to value through experience-led technology innovation and new connectivity models adoption.

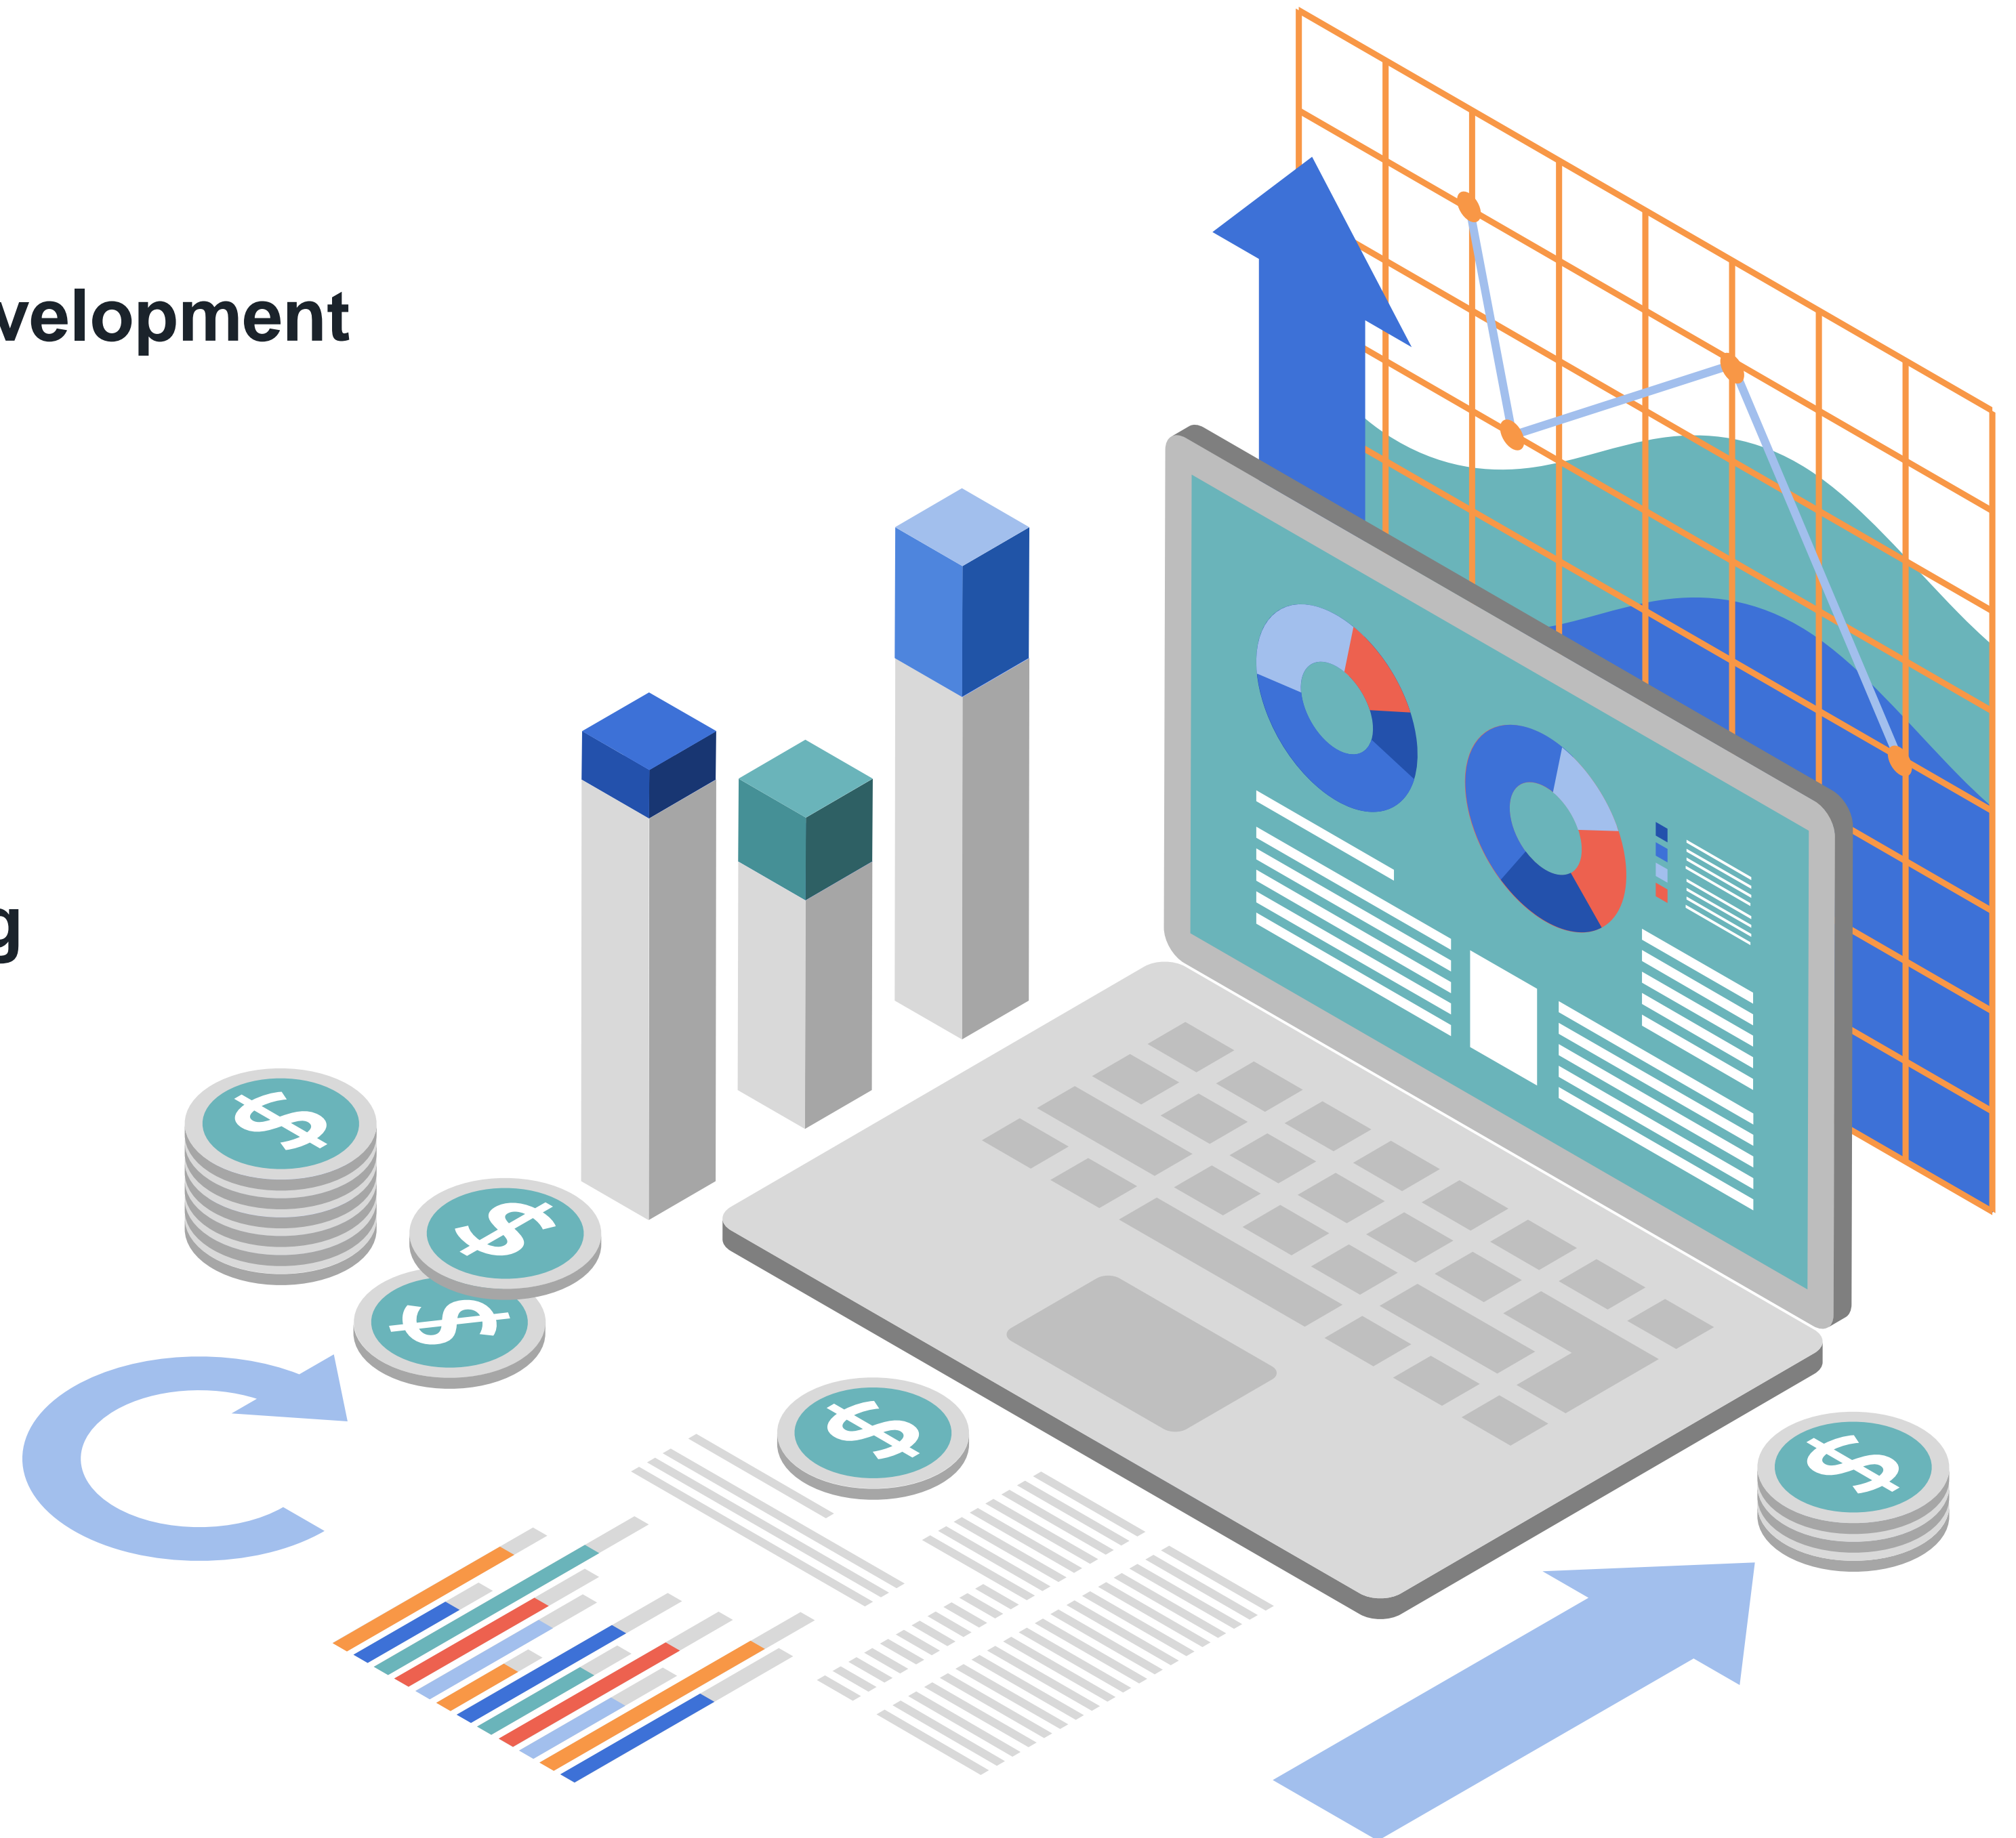

Operations support system (OSS) development

- Network planning and optimization
- Core network virtualization for 5G (cloudification)
- Services using VoIP (Voice over Internet Protocol) technology
 - UCaaS platforms and server-side apps
 - Custom SIP clients
 - Messaging and phone applications
- Telecom data engineering and visualization
 - Monitoring and performance management tools
 - Fraud protection and fault management solutions

Telecom digital services

- **Bespoke telecom applications development**
- **Network data and analytics**
- **Smart cities:**
 - **Urban mobility**
 - **Smart homes**
 - **Video analytics**
- **Agriculture**
 - **Farming drones and monitoring**
 - **Soil testing**
 - **Crop maintenance**
- **Automotive**
 - **Connected cars**
 - **Autonomous driving**
 - **Digital cockpits**
 - **Entertainment systems**
- **Manufacturing**
 - **Digital twins**
 - **Process automation**
